

| Reference | Date/Time | Location | Runway | F/W Movements | Total Movements | Complaint | Action |
|-----------|----------------------|---------------------------|--------|---------------|-----------------|---|---|
| FW23/4 | 13/08/23 1524hrs | RH2 9DX outside ATZ | 25L | 73 | 123 | The complainant stated “Not so many large aircraft today, too many light aircraft flying.” | The complainant resides outside the ATZ adjacent to the Buckland outbound route. If flown correctly fixed-wing aircraft would not overfly this area. Reminder sent to based operators. |
| FW23/5 | 29/08/23 1840hrs. | RH1 5PA with ATZ | 25L | 120 | 211 | The complainant stated that they were overflown by aircraft that were too low. | The complainant resides within the ATZ, close to the Eastern Aerodrome boundary. Two aircraft, from different flying schools, were conducting glide approaches to the active runway; these are the most likely aircraft to have caused this complaint. The flight path flown on glide approaches varies greatly; one was commenced from the overhead and the other two from within the normal circuit. Email sent to complainant. |

Helicopter Flying Complaints – August 2023
